

# WHAT DO I DO NOW?

## HOW TO SET UP YOUR SILENT DISCO KIT

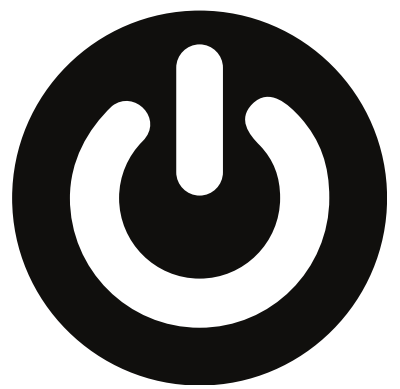

### 1.) UNPACK YOUR BOX OF EQUIPMENT

You should have the following:

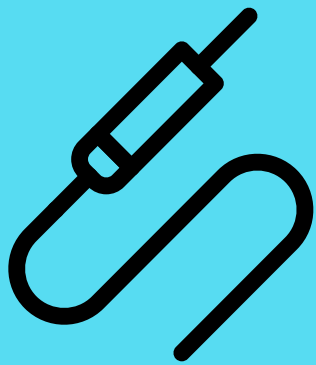

- The amount of wireless headphones you requested.
- 3 transmitters + 3 power cables
- 3 3.5mm aux cables
- 1 multi usb charging plug + charging connectors

### 2.) CONNECT TO THE POWER

Plug in the power cables to the back of each transmitter 'DC12V' and find a power source. **PLEASE NOTE**, Do not position the transmitters right next to each other as you will experience some interference.

### 3.) CONNECT TO DEVICE

Connect the aux cable into the back of the transmitter and then into the headphone jack of your audio device. Any device with a 3.5mm socket is compatible. We have included an Apple lightening to 3.5mm adapter for Apple products.

On the back of each transmitter, there is a 3 way switch. Make sure each transmitter is on a different notch e.g. transmitter 1 switch is set to the top, transmitter 2 switch is on the middle notch and transmitter 3 is set to the bottom notch. These are the channel frequencies.

### 4.) CONNECT THE HEADPHONES

Simply turn on the headphones by holding the solid black button for 2 seconds, the power light will turn on. To adjust the volume use the VOL + VOL - dial. To change between the 3 channels tap the solid black button. There is blue, red and green led lights to match the channel you're using. **PLEASE NOTE** the headphones automatically connect to the transmitters wirelessly through frequencies. There is no need for WiFi.

### 5.) PRESS PLAY AND PARTY!

If you are using a streaming service on your audio device, it's recommended you download the playlist prior to use, to avoid WiFi issues (we all hate a wifi blip 😞)

If you are using the same streaming account across all 3 devices, download your playlists and use Airplane mode to stop live streaming and enable you to play a different playlist on each channel (we do however love a lifehack! 😊)

### 6. DANCE LIKE NOONES WATCHING

Should you need some playlist inspiration - we have loads of free party playlists of all genres over on our Spotify account, head over to check it out.
